

Utopia Survey Guide Line

A. Download the File

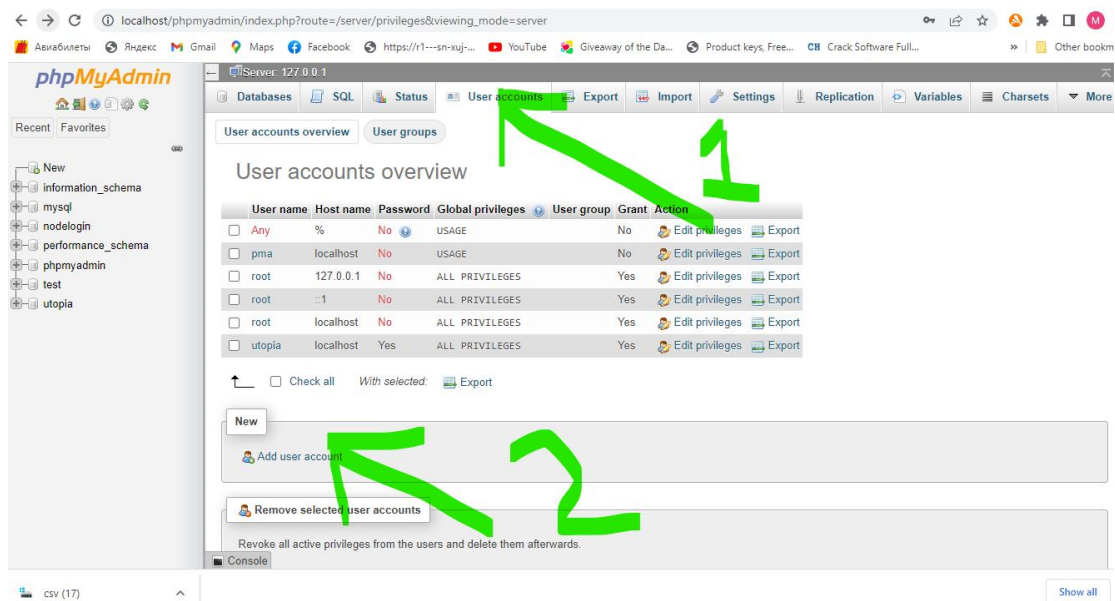

- ✓ Download the zip file from git hub repository Or clone from the git hub repository
- ✓ extract the zip file to the htdocs in XAMP

B. Create database

- Open your browser
- Paste this link on the url bar (" localhost/phpMyAdmin/ ")

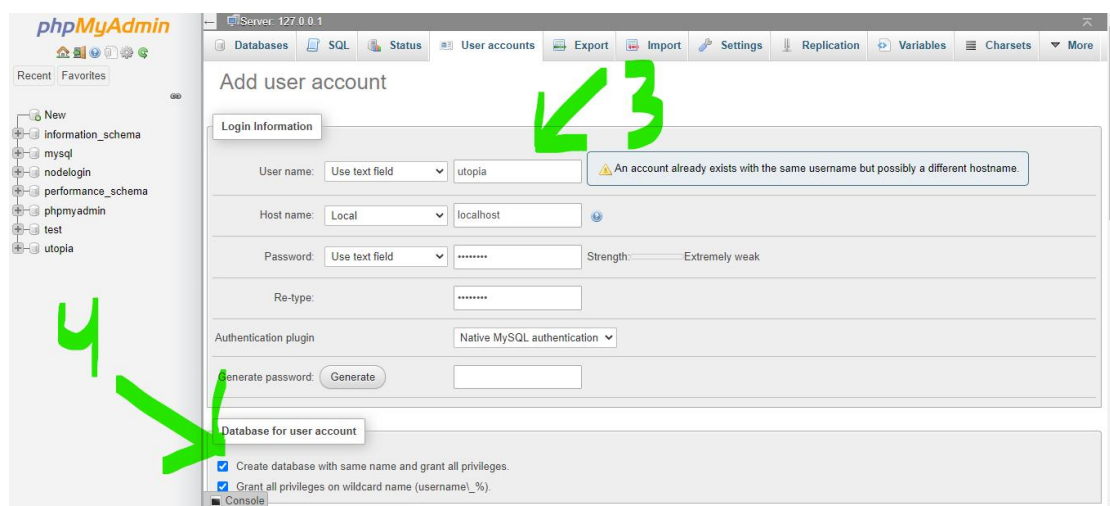

Option 1

Create database using the phpMyAdmin user interface!

Use the following info when you create

```
server_name = "localhost";  
user_name = "utopia";  
password = "12345678";  
Data base = "utopia";
```

Option 2

- Open the file db_connect.php using any text editor on the directory (“C:\xampp\htdocs\config\”)
- Then edit the information by your own

```
server_name = "localhost";
user_name = "utopia" ( change it your own user name like root);
password = "12345678" (provide your own password for the user name);
Data base = "utopia" (it is mandatory to create utopia database you can't
                    use your own database name;
```

- Open the file create_tables.php with any text editor that found in the directory (“C:\xampp\htdocs\db\”)
- Comment line 9 , 12 and 16 then
- Copy and paste the following path in your url bar (“http://localhost/db/create_tables.php”)
- Go to your text editor and Comment line 5 , 12 and 16 then uncomment line 9
- Copy and paste the following path in your url bar (“http://localhost/db/create_tables.php”)
- Or refresh the tab
- Go to your text editor and Comment line 5 , 9 and 16 then uncomment line 12
- Copy and paste the following path in your url bar (“http://localhost/db/create_tables.php”)

- Or refresh the tab
- Go to your text editor and Comment line 5 , 9 and 12 then uncomment line 16
- Copy and paste the following path in your url bar
("http://localhost/db/create_tables.php")
- Or refresh the tab
- Go to the page phpMyAdmin to be sure if you have created the tables
- Now all pages are fully functional you can explore

C. Explore the Pages

- ✓ Type on your url "localhost" then the home page will be opened (explore it)
- ✓ From the home page click the sign up button on the top from the navigation bar
- ✓ Fill your credential and sign up
- ✓ Activation email will be sent to your email so follow the info what we sent to you to activate your email!
- ✓ Or (may be your PHP mailer is not configured) you can activate your email manually on the database, make the `cust_status=1` in the table customer

Server: 127.0.0.1 » Database: utopia » Table: customer

0.0012 seconds.) [email: YYYYY@GMAIL.COM... - ...]

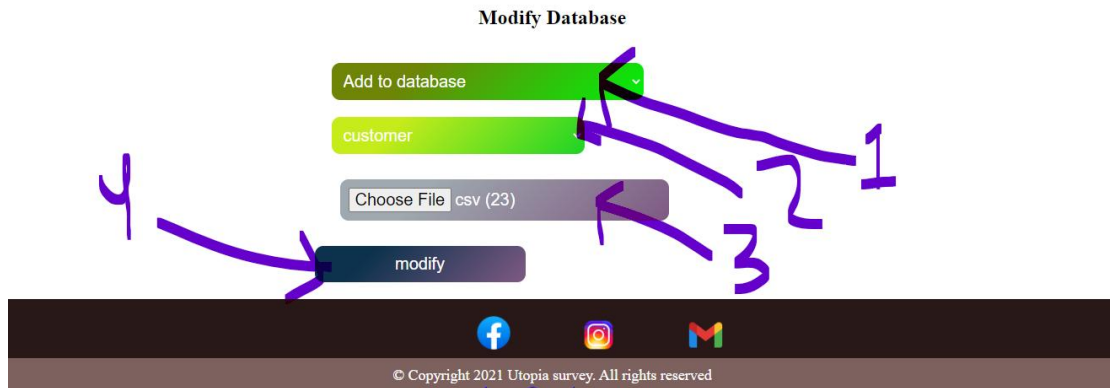

mail` DESC

- ✓ Now you can explore the website!
- ✓ Let us explore by uploading sample data
- ✓ Copy and paste the following url path on url bar
- ✓ (“localhost/pages/admin.php”)
- ✓ Choose the file customers from the follwing directory
- ✓ (“C:\xampp\htdocs\admin_files\”)

- ✓ Copy and paste the following url path on url bar
- ✓ (“localhost/pages/admin.php”)

- ✓ Choose the file surveys from the follwing directory
- ✓ (“C:\xampp\htdocs\admin_files\”)

- ✓ Now sample data to test the pages!
- ✓ Follow the following steps to have best experience on the website

At the bottom of the home page there is introduction video! Watch the video to have a better experience on the site!
